

Holographic LED Screen Features

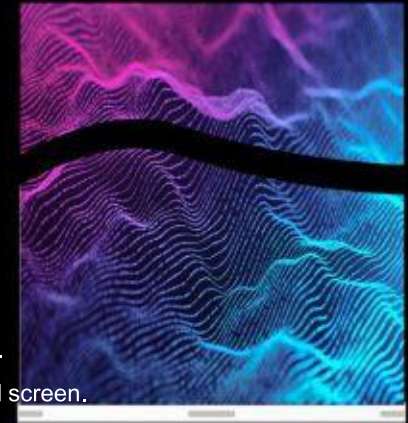

Transparent

It's a game-changer in the industry, without structural skeleton in the middle of the screen, which provides high visual transparency at 90% when glued onto a glass wall.

Flexible

Standard modules can be bent, cut, and used flexibly.
The best partner for curved glass and special-shaped screen.

Light

Professional aesthetic design, thin and beautiful.
Display body products. The weight is only 6KG/square meter.

Thin

Screen thickness is less than 2MM, which can be seamless surface mount.
Mounted on transparent glass.
